

PTA programs add value to a school community

...and increase the ability of a school to serve its families through additional resources of time and fundraising towards needed items.

But some school communities and their families have more resources than others.

We are seeking to find a solution to this disparity.

Mentors!

Seeking experienced PTA's that would be interested in mentoring PTA's that may desire some guidance as well as assistance in meeting the needs of their school community. Mentorship could include help establishing and running a PTA in compliance as well as share resources with their partner such as volunteer hours. Specifics can be worked out between partner schools and DCCPTA is happy to facilitate this component as well.

Mentees!

Does your PTA wish to be mentored? We know it can be tough to run a PTA and that having someone to partner with, to answer questions and to provide additional needed resources can make this all a little easier! We know you work hard, have great ideas and know your communities but are under-resourced!

New! PTA Mentorship Program
